

ABOUT US

HISTORY

Unidro Spa was established in 1971 and since then it has been active in the field of Utility Engineering, with a profile showing a prevailing interest in the contracting activity, based on the sale of highly specialized units and plant components and on the study and execution of complete projects, also on a turn-key basis.

In the years Unidro activities have been expanded beyond the range of the utilities, progressively covering other technologies mainly related to the Oil

and Gas field and including well-head process units, produced water treatment, gas dehydration and treatment.

Today, Unidro includes a head quarter and engineering centre in Milano and two highly specialised production facilities for pressure equipment fabrication and for skid fabrication and package assembly. Both facilities are located near Milano, in northern Italy.

KNOW-HOW AND CAPABILITIES

Unidro can design and supply complete packages for different utilities and process related applications including:

- Water and Waste Water Treatment Packages
- Produced Water Treatment Packages
- Gas treatment packages
- Lean amines treatment packages
- Thermal deareators, vacuum degasifiers packages
- Brine purification/polishing packages for Chloralkali plants

Moreover, a wide experience in design and fabrication of individual equipment such as Heat Exchangers, Cartridge filters, Liquid/liquid Separators, Liquid/gas Separators extend the range of our products to several Oil and Gas related technologies.

For all above UNIDRO can supply a full service package including

- project management
- basic and detailed engineering
- supply of packages or individual equipment
- erection, erection supervision and start-up
- personnel training, after sale service

COMPANY'S ORGANIZATION

The company technical staff is organized in the following sections:

- proposal and sales
- project management and coordination
- instrument engineering
- mechanical engineering
- quality control and expediting
- shops management and staff

For each job a Project Team is set up, with a Project Manager who is responsible for the accomplishment of all the contract obligations.

The Project Manager is the reference contact for our Client and coordinates the activities of the Project Team.

ABOUT US

REFERENCES AND MAJOR CUSTOMERS

UNIDRO has a wide international work experience in many countries such as Algeria, Saudi Arabia, Egypt, UAE, Qatar, South America, Malaysia, Singapore, Thailand, Iran, Iraq, Pakistan, Poland, Russia, Indonesia, China, Turkey, Libya.

Most of Unidro's largest clients have been repeatedly selecting our Company for the supply of engineering and equipment in the past years, thus certifying the good quality of our job both in terms of goods and services provided.

Among the main usual customers we can mention EPC contractors such as :

- SAIPEM/SNAMPROGETTI (Italy)
- SAIPEM (France)
- TOYO ENGINEERING CORPORATION (Japan)
- TECNIMONT (Italy)
- BABCOCK-HITACHI (Japan)
- MAN FIA (Germany)
- TECHNIP (France)
- CHIYODA Corporation (Japan)

- ENELPOWER (Italy)
- JGC Corporation (Japan)
- ABB-LUMMUS (Nederland)
- MITSUBISHI HEAVY INDUSTRIES (Japan)
- MITSUI ENGINEERING & SHIPBUILDING (Japan)
- HITACHI (Japan)
- CHLORINE ENGINEERS (Japan)

As well as End Users such as:

- ENI SpA (Italy)
- RASGAS (Qatar)
- ENEL SpA (Italy)
- DOLPHIN ENERGY Ltd. (Qatar)
- SOUTH OIL COMPANY (Iraq)
- QATARGAS (Qatar)
- ST MICROELECTRONICS SpA (Italy)

For more information about Clients and Experiences you may see our Reference Lists.
